<p style="text-align: center;"><b>DESIGN &amp; TECHNOLOGY</b></p>		<p>Introduce concept of product design- purpose, end use, user etc.</p> <p><b>Design, make and evaluate a bug hotel for minibeasts to live in together.</b></p> <p>Chn discuss hotels they have seen and think about what the features will be what will it need to include? What will be important?</p> <p style="text-align: center;">Label features Who is it for? What is the purpose?</p>	<p><b>Prior Learning</b> Demonstrate measuring, marking out, cutting, shaping, joining and finishing techniques with a range of tools and new and reclaimed materials that children are likely to use to make their structures. Discuss the suitability of materials for their products according to their characteristics.</p> <ul style="list-style-type: none"> <li>• Ask the children to build and explore a variety of freestanding structures using construction kits, such as wooden blocks, interconnecting plastic bricks and those that make frameworks e.g. <i>How can you stop your structures from falling over? How they can be made stronger and stiffer in order to carry a load?</i></li> </ul> <p>Children could make models of the structures they have seen in school and the local area.</p> <ul style="list-style-type: none"> <li>• Ask children to fold paper or card in different ways to make freestanding structures, using masking tape where necessary to make joins. Encourage them to think about how folding materials can make them stronger, stiffer, stand up and be more stable e.g. <i>Can they support an object on top of their structures without it falling over or breaking?</i></li> </ul>	<p><b>Designing</b> Discuss with the children what structure they will be designing, making and evaluating e.g. <i>Who will your product be for? What will be its purpose? What materials will you use? How will you make it strong and stable?</i></p> <ul style="list-style-type: none"> <li>• Generate some simple design criteria with the children e.g. the structure should stand up on its own, it should be strong enough to carry Teddy.</li> <li>• Encourage the children to develop their ideas through talking, drawing and making mock-ups of their ideas with construction kits and other materials.</li> <li>• As a whole class, plan the order in which the structures will be made</li> </ul>	<p><b>Making</b></p> <ul style="list-style-type: none"> <li>• Plan by suggesting what to do next.</li> <li>• Select and use tools, skills and techniques, explaining their choices.</li> <li>• Select new and reclaimed materials and construction kits to build their structures. <ul style="list-style-type: none"> <li>• Use simple finishing techniques suitable for the structure they are creating.</li> </ul> </li> </ul>	<p><b>Evaluation</b> Evaluate their product by discussing how well it works in relation to the purpose, the user and whether it meets the original design criteria.</p> <p>. Children could make their final products from construction kits, new and reclaimed materials or any combination of these, according to their characteristics.</p> <ul style="list-style-type: none"> <li>• Ask children to evaluate their developing ideas and final products against original design criteria</li> </ul>
